

Curve Sketching 3

Given the function of the graph

Sketch the following graphs.

1. $y = \frac{1}{f(x)}$
2. $y = \frac{1}{f(|x|-2)}$
3. $y = x + f(x)$
4. $y = xf(x)$
5. $y = f(x^2)$
6. $y = f(x^3)$
7. $y = f(\sin(x))$
8. $|y| = f(\cos(x))$
9. $y = f(\tan(x))$
10. $y = \sin(f(|x|))$
11. $y = \cos(f(x))$
12. $y = \tan(f(x) - 1)$
13. $y = \sin^{-1}(f(x))$
14. $y = \cos^{-1}(f(x))$
15. $y = \tan^{-1}(f(x))$
16. $y = 2^{f(x)}$
17. $y = 3^{-f(x)}$
18. $y = \log(f(x))$
19. $y = \log(|f(x)|)$
20. $y = f\left(\frac{1}{x}\right)$

Answer:

*Dotted line is the original graph
